KCTD7 (NM_001167961) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human potassium channel tetramerisation domain containing 7

(KCTD7), transcript variant 2, 1 mg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC229837 representing NM 001167961

or AA Sequence: Red=Cloning site Green=Tags(s)

IYEFKITW

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

Predicted MW: 33.4

Concentration: >0.05 µg/µL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: NULL or Add: Recombinant proteins was captured through anti-DDK affinity column followed

by conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeg: NP 001161433

Locus ID: 154881

KCTD7 (NM_001167961) Human Recombinant Protein - TP329837L

UniProt ID: Q96MP8

Cytogenetics: 7q11.21

RefSeq ORF: 864

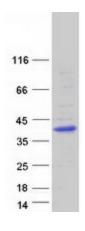

Synonyms: CLN14; EPM3

Summary: This gene encodes a member of the potassium channel tetramerization domain-containing

protein family. Family members are identified on a structural basis and contain an aminoterminal domain similar to the T1 domain present in the voltage-gated potassium channel. Mutations in this gene have been associated with progressive myoclonic epilepsy-3. Alternative splicing results in multiple transcript variants.[provided by RefSeq, Jan 2011]

Product images:

Coomassie blue staining of purified KCTD7 protein (Cat# [TP329837]). The protein was produced from HEK293T cells transfected with KCTD7 cDNA clone (Cat# [RC229837]) using MegaTran 2.0 (Cat# [TT210002]).
