#### ZFYVE27 (NM\_001174120) Human Recombinant Protein - TP329877L

**UniProt ID:** Q5T4F4

Cytogenetics: 10q24.2

RefSeq ORF: 954

PROTRUDIN; SPG33 Synonyms:

**Summary:** This gene encodes a protein with several transmembrane domains, a Rab11-binding domain

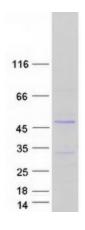

> and a lipid-binding FYVE finger domain. The encoded protein appears to promote neurite formation. A mutation in this gene has been reported to be associated with hereditary spastic

paraplegia, however the pathogenicity of the mutation, which may simply represent a

polymorphism, is unclear. [provided by RefSeq, Mar 2010]
