RhoGDI (ARHGDIA) (NM_001185078) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Purified recombinant protein of Homo sapiens Rho GDP dissociation inhibitor (GDI) alpha

(ARHGDIA), transcript variant 3, 20 μg

Species: Human
Expression Host: HEK293T

Expression cDNA Clone >RC231004 representing NM 001185078

or AA Sequence: Red=Cloning site Green=Tags(s)

DKTDHLSWEWNLTIKKDWKD

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Tag: C-Myc/DDK

Predicted MW: 18.7

Concentration: $>0.05 \mu g/\mu L$ as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: 25 mM Tris-HCl, 100 mM glycine, pH 7.3, 10% glycerol

Preparation: NULL or Add: Recombinant proteins was captured through anti-DDK affinity column followed

by conventional chromatography steps.

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Storage: Store at -80°C.

Stability: Stable for 12 months from the date of receipt of the product under proper storage and

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeg: NP 001172007

Locus ID: 396

UniProt ID: P52565

RhoGDI (ARHGDIA) (NM_001185078) Human Recombinant Protein - TP331004

Cytogenetics: 17q25.3

RefSeq ORF: 480

Synonyms: GDIA1; HEL-S-47e; NPHS8; RHOGDI; RHOGDI-1

Summary: This gene encodes a protein that plays a key role in the regulation of signaling through Rho

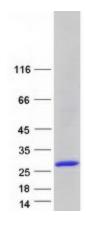

> GTPases. The encoded protein inhibits the disassociation of Rho family members from GDP (guanine diphosphate), thereby maintaining these factors in an inactive state. Activity of this protein is important in a variety of cellular processes, and expression of this gene may be altered in tumors. Mutations in this gene have been found in individuals with nephrotic syndrome, type 8. Alternate splicing results in multiple transcript variants. [provided by

RefSeq, Jul 2014]

Protein Families: Druggable Genome

Protein Pathways: Neurotrophin signaling pathway

Product images:

Coomassie blue staining of purified ARHGDIA protein (Cat# TP331004). The protein was produced from HEK293T cells transfected with ARHGDIA cDNA clone (Cat# [RC231004]) using

MegaTran 2.0 (Cat# [TT210002]).
