

# Product datasheet for TP700162

# DDR2 (NM\_001014796) Human Recombinant Protein

### **Product data:**

Product Type:	Recombinant Proteins
Description:	Purified recombinant protein of human discoidin domain receptor tyrosine kinase 2(DDR2), transcript variant 1, with C-terminal DDK/His tag, expressed in human cells, 20 μg
Species:	Human
Expression Host:	HEK293T
Expression cDNA Clone or AA Sequence:	A DNA sequence from TrueORF clone, RC600062, encoding the region (Lys22 – Arg399) of human DDR2
Tag:	C-DDK/His
Predicted MW:	45 kDa
Concentration:	>0.05 µg/µL as determined by microplate BCA method
Purity:	> 80% as determined by SDS-PAGE and Coomassie blue staining
Buffer:	PBS, pH 7.4, 10% glycerol
Note:	For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process.
Storage:	Store at -80°C.
Stability:	Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.
RefSeq:	<u>NP 001014796</u>
Locus ID:	4921
UniProt ID:	<u>Q16832</u> , <u>A0A024R906</u>
RefSeq Size:	3252
Cytogenetics:	1q23.3
RefSeq ORF:	1197
Synonyms:	MIG20a; NTRKR3; TKT; TYRO10; WRCN

#### DDR2 (NM\_001014796) Human Recombinant Protein – TP700162

Summary: This gene encodes a member of the discoidin domain receptor subclass of the receptor tyrosine kinase (RTKs) protein family. RTKs play a key role in the communication of cells with their microenvironment. The encoded protein is a collagen-induced receptor that activates signal transduction pathways involved in cell adhesion, proliferation, and extracellular matrix remodeling. This protein is expressed in numerous cell types and may alos be involved in wound repair and regulate tumor growth and invasiveness. Mutations in this gene are the cause of short limb-hand type spondylometaepiphyseal dysplasia. [provided by RefSeq, Aug 2017]

#### Protein Families: Druggable Genome, Protein Kinase, Transmembrane
