# Product datasheet for TP700173

# AXL (NM\_001699) Human Recombinant Protein

# **Product data:**

Product Type:	Recombinant Proteins
Description:	Purified recombinant protein of human AXL receptor tyrosine kinase(AXL), transcript variant 2, with C-terminal DDK/His tag, expressed in human cells, 20 μg
Species:	Human
Expression Host:	HEK293T
Expression cDNA Clone or AA Sequence:	A DNA sequence from TrueORF clone, RC600073, encoding the region (Ala26 – Ser442) of human AXL
Tag:	C-DDK/His
Predicted MW:	48 kDa
Concentration:	>0.05 $\mu$ g/ $\mu$ L as determined by microplate BCA method
Purity:	> 80% as determined by SDS-PAGE and Coomassie blue staining
Buffer:	PBS, pH 7.4, 10% glycerol
Note:	For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process.
Storage:	Store at -80°C.
Stability:	Stable for 12 months from the date of receipt of the product under proper storage and handling conditions. Avoid repeated freeze-thaw cycles.
RefSeq:	<u>NP 001690</u>
Locus ID:	558
UniProt ID:	<u>P30530</u>
RefSeq Size:	4723
Cytogenetics:	19q13.2
RefSeq ORF:	1326
Synonyms:	ARK; JTK11; Tyro7; UFO

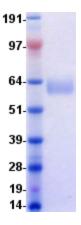

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

## **GRIGENE** AXL (NM\_001699) Human Recombinant Protein – TP700173

Summary:The protein encoded by this gene is a member of the Tyro3-Axl-Mer (TAM) receptor tyrosine<br/>kinase subfamily. The encoded protein possesses an extracellular domain which is composed<br/>of two immunoglobulin-like motifs at the N-terminal, followed by two fibronectin type-III<br/>motifs. It transduces signals from the extracellular matrix into the cytoplasm by binding to<br/>the vitamin K-dependent protein growth arrest-specific 6 (Gas6). This gene may be involved in<br/>several cellular functions including growth, migration, aggregation and anti-inflammation in<br/>multiple cell types. Alternative splicing results in multiple transcript variants of this gene.<br/>[provided by RefSeq, Jul 2013]

#### **Protein Families:** Druggable Genome, Protein Kinase, Transmembrane
