

Product datasheet for TP700196

CD47 (NM_001777) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins Description: Purified recombinant protein of Homo sapiens CD47 molecule (CD47), residues 19-141aa, with C-terminal Fc tag, expressed in HEK293 cells. Species: Human **Expression Host:** HEK293T **Expression cDNA Clone** A DNA sequence from TrueORF clone, RC218813, encoding the extracellular domain (GIn19 or AA Sequence: Glu141) of human CD47 molecule (CD47) C-Fc Tag: Predicted MW: 35.21 **Concentration:** >0.05 µg/µL as determined by microplate BCA method **Purity:** > 80% as determined by SDS-PAGE and Coomassie blue staining **Buffer:** PBS, pH 7.4, 10% glycerol Note: For testing in cell culture applications, please filter before use. Note that you may experience some loss of protein during the filtration process. Store at -80°C. Storage: Stable for 12 months from the date of receipt of the product under proper storage and Stability: handling conditions. Avoid repeated freeze-thaw cycles. **RefSeq:** NP 001768 Locus ID: 961 **UniProt ID:** Q08722 5346 **RefSeq Size:** Cytogenetics: 3q13.12 **RefSeq ORF:** 969 Synonyms: IAP; MER6; OA3

	CD47 (NM_001777) Human Recombinant Protein – TP700196
Summary:	This gene encodes a membrane protein, which is involved in the increase in intracellular calcium concentration that occurs upon cell adhesion to extracellular matrix. The encoded protein is also a receptor for the C-terminal cell binding domain of thrombospondin, and it may play a role in membrane transport and signal transduction. This gene has broad tissue distribution, and is reduced in expression on Rh erythrocytes. Alternatively spliced transcript variants have been found for this gene. [provided by RefSeq, Jul 2010]
Protein Families:	Druggable Genome, Transmembrane
Protein Pathways	: ECM-receptor interaction
