ST2 (IL1RL1) (NM 003856) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Purified recombinant protein of Human interleukin 1 receptor-like 1 (IL1RL1), transcript

variant 2

Species: Human **Expression Host:** HEK293T

Expression cDNA Clone

A DNA sequence from TrueORF clone, RC205916, encoding the mature form (Lys19 – Phe328)

of human IL1RL1.

or AA Sequence: C-DDK/His Tag:

Predicted MW: 35 kDa

Concentration: >0.05 µg/µL as determined by microplate BCA method

Purity: > 80% as determined by SDS-PAGE and Coomassie blue staining

Buffer: PBS, pH 7.4, 10% glycerol

Note: For testing in cell culture applications, please filter before use. Note that you may experience

some loss of protein during the filtration process.

Store at -80°C. Storage:

Stable for 12 months from the date of receipt of the product under proper storage and Stability:

handling conditions. Avoid repeated freeze-thaw cycles.

RefSeq: NP 003847

Locus ID: 9173 UniProt ID: Q01638 3909 RefSeq Size:

Cytogenetics: 2q12.1 RefSeq ORF: 984

Synonyms: DER4; FIT-1; IL33R; ST2; ST2L; ST2V; T1

Summary:

The protein encoded by this gene is a member of the interleukin 1 receptor family. Studies of the similar gene in mouse suggested that this receptor can be induced by proinflammatory stimuli, and may be involved in the function of helper T cells. This gene, interleukin 1 receptor, type I (IL1R1), interleukin 1 receptor, type II (IL1R2) and interleukin 1 receptor-like 2 (IL1RL2) form a cytokine receptor gene cluster in a region mapped to chromosome 2q12. Alternative splicing of this gene results in multiple transcript variants. [provided by RefSeq, Jul 2008]

Protein Families:

Druggable Genome, Secreted Protein, Transmembrane
