G CSF (CSF3) (NM_000759) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human colony stimulating factor 3 (granulocyte) (CSF3), transcript

variant 1, produced in E. coli

Species: Human
Expression Host: E. coli

Expression cDNA Clone

or AA Sequence:

Thr31-Pro204

Tag: Tag Free
Predicted MW: 18.8 kDa
Concentration: lot specific

Purity: >95% as determined by SDS-PAGE and Coomassie blue staining

Buffer: Provided lyophilized from a 0.2 µm filtered solution of 20 mM Tris-HCl, 150 mM NaCl

Bioactivity: ED50 is less than 0.1 ng/ml as calculated by the dose-dependent proliferation of murine NFS-

60 indicator cells. Specific Activity of 6.0 x 107 IU/ mg.

Endotoxin: < 0.1 EU per µg protein as determined by LAL test

Reconstitution Method: Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the

lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

Storage: Store at -80°C.

Stability: Stable for at least 6 months from date of receipt under proper storage and handling

conditions.

RefSeq: NP 000750

Locus ID: 1440

UniProt ID: P09919, Q8N4W3

Cytogenetics: 17q21.1

Synonyms: C17orf33; CSF3OS; GCSF

Summary: This gene encodes a member of the IL-6 superfamily of cytokines. The encoded cytokine

controls the production, differentiation, and function of granulocytes. Granulocytes are a type of white blood cell that are part of the innate immune response. A modified form of this protein is commonly administered to manage chemotherapy-induced neutropenia. Alternatively spliced transcript variants have been described for this gene. [provided by

RefSeq, May 2020]

Protein Families: Druggable Genome, ES Cell Differentiation/IPS, Secreted Protein

Protein Pathways: Cytokine-cytokine receptor interaction, Hematopoietic cell lineage, Jak-STAT signaling

pathway
