Interferon gamma (IFNG) (NM_000619) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human interferon, gamma (IFNG)

Species: Human
Expression Host: E. coli

Expression cDNA Clone

Gln24-Gln166

or AA Sequence:

Tag: Tag Free
Predicted MW: 16.9 kDa
Concentration: lot specific

Purity: >95% as determined by SDS-PAGE and Coomassie blue staining

Buffer: Provided lyophilized from a 0.2 μm filtered solution of 20 mM Tris-HCl, 150 mM NaCl

Bioactivity: Specific Activity is greater than 1.5 x 107 IU/mg as determined in a viral resistance assay using

VSV-WISH cells.

Endotoxin: < 0.1 EU per μg protein as determined by LAL test

Reconstitution Method: Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the

lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

Storage: Store at -80°C.

Stability: Stable for at least 6 months from date of receipt under proper storage and handling

conditions.

RefSeg: NP 000610

 Locus ID:
 3458

 UniProt ID:
 P01579

 Cytogenetics:
 12q15

Synonyms: IFG; IFI; IMD69

Summary: This gene encodes a soluble cytokine that is a member of the type II interferon class. The

encoded protein is secreted by cells of both the innate and adaptive immune systems. The active protein is a homodimer that binds to the interferon gamma receptor which triggers a cellular response to viral and microbial infections. Mutations in this gene are associated with

an increased susceptibility to viral, bacterial and parasitic infections and to several

autoimmune diseases. [provided by RefSeq, Dec 2015]

Protein Families: Druggable Genome, Secreted Protein

Protein Pathways: Allograft rejection, Cytokine-cytokine receptor interaction, Graft-versus-host disease, Jak-STAT

signaling pathway, Natural killer cell mediated cytotoxicity, Proteasome, Regulation of autophagy, Systemic lupus erythematosus, T cell receptor signaling pathway, TGF-beta

signaling pathway, Type I diabetes mellitus
