Tau (MAPT) (NM_001123066) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant protein of human microtubule-associated protein tau (MAPT), transcript variant

6

Species: Human
Expression Host: E. coli

Expression cDNA Clone

or AA Sequence:

Gln249-Gln381

Tag: C-His

Predicted MW: 15.4 kDa

Concentration: lot specific

Purity: >95% as determined by SDS-PAGE and Coomassie blue staining

Buffer: Provided lyophilized from a 0.2 μm filtered solution of 20 mM Tris-HCl, 150 mM NaCl

Endotoxin: < 0.1 EU per µg protein as determined by LAL test

Reconstitution Method: Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the

lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 μ g/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

Storage: Store at -80°C.

Stability: Stable for at least 6 months from date of receipt under proper storage and handling

conditions.

RefSeq: NP 001116538

 Locus ID:
 4137

 UniProt ID:
 P10636

 Cytogenetics:
 17q21.31

Synonyms: DDPAC; FTDP-17; MAPTL; MSTD; MTBT1; MTBT2; PPND; PPP1R103; TAU; tau-40

Summary: This gene encodes the microtubule-associated protein tau (MAPT) whose transcript

undergoes complex, regulated alternative splicing, giving rise to several mRNA species. MAPT transcripts are differentially expressed in the nervous system, depending on stage of neuronal maturation and neuron type. MAPT gene mutations have been associated with

several neurodegenerative disorders such as Alzheimer's disease, Pick's disease,

frontotemporal dementia, cortico-basal degeneration and progressive supranuclear palsy.

[provided by RefSeq, Jul 2008]

Protein Families: Druggable Genome

Protein Pathways: Alzheimer's disease, MAPK signaling pathway
