# Product datasheet for TP720216L

### p18 INK4c (CDKN2C) (NM\_001262) Human Recombinant Protein

## **Product data:**

Product Type:	Recombinant Proteins
Description:	Recombinant protein of human cyclin-dependent kinase inhibitor 2C (p18, inhibits CDK4) (CDKN2C), transcript variant 1
Species:	Human
Expression Host:	E. coli
Expression cDNA Clone or AA Sequence:	Met1-Gln168
Tag:	N-His
Predicted MW:	20.3 kDa
Concentration:	lot specific
Purity:	>95% as determined by SDS-PAGE and Coomassie blue staining
Buffer:	Provided lyophilized from a 0.2 $\mu m$ filtered solution of 20 mM Tris-HCl, 150 mM NaCl
Endotoxin:	< 0.1 EU per $\mu$ g protein as determined by LAL test
Endotoxin: Reconstitution Method:	< 0.1 EU per µg protein as determined by LAL test Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.
	Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less
Reconstitution Method:	Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.
Reconstitution Method: Storage:	Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Store at -80°C. Stable for at least 3 months from date of receipt under proper storage and handling
Reconstitution Method: Storage: Stability:	Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Store at -80°C. Stable for at least 3 months from date of receipt under proper storage and handling conditions.
Reconstitution Method: Storage: Stability: RefSeq:	Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Store at -80°C. Stable for at least 3 months from date of receipt under proper storage and handling conditions. <u>NP 001253</u>
Reconstitution Method: Storage: Stability: RefSeq: Locus ID:	Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Store at -80°C. Stable for at least 3 months from date of receipt under proper storage and handling conditions. <u>NP 001253</u> 1031
Reconstitution Method: Storage: Stability: RefSeq: Locus ID: UniProt ID:	Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Store at -80°C. Stable for at least 3 months from date of receipt under proper storage and handling conditions. <u>NP 001253</u> 1031 <u>P42773, Q6ICV4</u>

# Image: Protein Families:p18 INK4c (CDKN2C) (NM\_001262) Human Recombinant Protein - TP720216LSummary:The protein encoded by this gene is a member of the INK4 family of cyclin-dependent kinase<br/>inhibitors. This protein has been shown to interact with CDK4 or CDK6, and prevent the<br/>activation of the CDK kinases, thus function as a cell growth regulator that controls cell cycle<br/>G1 progression. Ectopic expression of this gene was shown to suppress the growth of human<br/>cells in a manner that appears to correlate with the presence of a wild-type RB1 function.<br/>Studies in the knockout mice suggested the roles of this gene in regulating spermatogenesis,<br/>as well as in suppressing tumorigenesis. Two alternatively spliced transcript variants of this<br/>gene, which encode an identical protein, have been reported. [provided by RefSeq, Jul 2008]Protein Families:Druggable Genome

Protein Pathways:
