

Product datasheet for TP720302M

FLRT1 (NM_013280) Human Recombinant Protein

Product data:

Product Type:	Recombinant Proteins
Description:	Recombinant protein of human fibronectin leucine rich transmembrane protein 1 (FLRT1)
Species:	Human
Expression Host:	HEK293
Expression cDNA Clone or AA Sequence:	lle21-Pro524
Tag:	C-His
Predicted MW:	56.5 kDa
Concentration:	lot specific
Purity:	>95% as determined by SDS-PAGE and Coomassie blue staining
Buffer:	Lyophilized from a 0.2 um filtered solution of 20mM PB, 150mM NaCl, pH 7.2.
Endotoxin:	< 0.1 EU per μ g protein as determined by LAL test
Reconstitution Method:	Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less
	than 100 μ g/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.
Storage:	than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Lyophilized protein should be stored at < -20°C, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
Storage: Stability:	Lyophilized protein should be stored at < -20°C, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of

SERTI (NM_013280) Human Recombinant Protein – TP720302M

Summary:This gene encodes a member of the fibronectin leucine rich transmembrane protein (FLRT)
family. The family members may function in cell adhesion and/or receptor signalling. Their
protein structures resemble small leucine-rich proteoglycans found in the extracellular
matrix. The encoded protein shares sequence similarity with two other family members,
FLRT2 and FLRT3. This gene is expressed in kidney and brain. [provided by RefSeq, Jul 2008]

Protein Families: Druggable Genome, Transmembrane
