

# Product datasheet for TP720473L

## CLEC10A (NM\_006344) Human Recombinant Protein

### **Product data:**

#### **Product Type: Recombinant Proteins Description:** Recombinant protein of human C-type lectin domain family 10, member A (CLEC10A), transcript variant 2 Species: Human **Expression Host: HEK293 Expression cDNA Clone** Gln61-His316 or AA Sequence: C-His Tag: Predicted MW: 29.8 kDa **Concentration:** lot specific **Purity:** >95% as determined by SDS-PAGE and Coomassie blue staining **Buffer:** Provided lyophilized from a 0.2 µm filtered solution of 20 mM Tris-HCl, 150 mM NaCl Endotoxin: < 0.1 EU per µg protein as determined by LAL test **Reconstitution Method:** Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Storage: Store at -80°C. Stable for at least 6 months from date of receipt under proper storage and handling Stability: conditions. NP 006335 RefSeq: Locus ID: 10462 **UniProt ID:** Q8IUN9 Cytogenetics: 17p13.1 Synonyms: CD301; CLECSF13; CLECSF14; HML; HML2; MGL

### **CLEC10A (NM\_006344) Human Recombinant Protein – TP720473L**

Summary:This gene encodes a member of the C-type lectin/C-type lectin-like domain (CTL/CTLD)<br/>superfamily. Members of this family share a common protein fold and have diverse functions,<br/>such as cell adhesion, cell-cell signalling, glycoprotein turnover, and roles in inflammation and<br/>immune response. The encoded type 2 transmembrane protein may function as a cell<br/>surface antigen. Two transcript variants encoding distinct isoforms have been identified for<br/>this gene. [provided by RefSeq, Jul 2008]

Protein Families: Transmembrane
