Product Type:	Recombinant Proteins
Description:	Recombinant protein of human endothelial differentiation-related factor 1 (EDF1), transcript variant alpha
Species:	Human
Expression Host:	E. coli
Expression cDNA Clone or AA Sequence:	Ala2-Lys148
Tag:	C-His
Predicted MW:	17.4 kDa
Concentration:	lot specific
Purity:	>95% as determined by SDS-PAGE and Coomassie blue staining
Buffer:	Lyophilized from a 0.2 um filtered solution of 20mM Tris-HCl, 150mM NaCl, pH 8.0.
Endotoxin:	< 0.1 EU per μ g protein as determined by LAL test
Reconstitution Method:	Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.
Storage:	Lyophilized protein should be stored at < -20°C, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
Stability:	Stable for at least 6 months from date of receipt under proper storage and handling conditions.
RefSeq:	<u>NP 003783</u>
Locus ID:	8721
UniProt ID:	<u>O60869</u>
Cytogenetics:	9q34.3
Synonyms:	CFAP280; EDF-1; MBF1

CRIGENE EDF1 (NM_003792) Human Recombinant Protein – TP720515XL

Summary:This gene encodes a protein that may regulate endothelial cell differentiation, lipid
metabolism, and hormone-induced cardiomyocyte hypertrophy. The encoded protein has
also been found to act as a transcriptional coactivator by interconnecting the general
transcription factor TATA element-binding protein (TBP) and gene-specific activators.
Alternate splicing results in multiple transcript variants. [provided by RefSeq, Jul 2013]

Protein Families: Druggable Genome, Transcription Factors
