Neurotrophin 3 (NTF3) (NM_002527) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Purified recombinant protein of Human neurotrophin 3 (NTF3), transcript variant 2

Species: Human
Expression Host: E. coli

Expression cDNA Clone

T 400

or AA Sequence:

Tyr139-Thr257

Tag: Tag Free
Predicted MW: 13.6 kDa
Concentration: lot specific

Purity: >95% as determined by SDS-PAGE and Coomassie blue staining

Buffer: Provided lyophilized from a 0.2 μm filtered solution of 20 mM Tris-HCl, 150 mM NaCl

Endotoxin: Endotoxin level is < 0.1 ng/μg of protein (< 1 EU/μg)

Reconstitution Method: Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the

lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 μ g/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

Storage: Store at -80°C.

Stability: Stable for at least 6 months from date of receipt under proper storage and handling

conditions.

RefSeq: NP 002518

 Locus ID:
 4908

 UniProt ID:
 P20783

 RefSeq Size:
 1182

 Cytogenetics:
 12p13.31

RefSeq ORF: 771

Synonyms: HDNF; NGF-2; NGF2; NT-3; NT3

Neurotrophin 3 (NTF3) (NM_002527) Human Recombinant Protein - TP720592L

Summary: The protein encoded by this gene is a member of the neurotrophin family, that controls

survival and differentiation of mammalian neurons. This protein is closely related to both nerve growth factor and brain-derived neurotrophic factor. It may be involved in the maintenance of the adult nervous system, and may affect development of neurons in the embryo when it is expressed in human placenta. NTF3-deficient mice generated by gene targeting display severe movement defects of the limbs. The mature peptide of this protein is

identical in all mammals examined including human, pig, rat and mouse. [provided by

RefSeq, Jul 2008]

Protein Families: Druggable Genome, Secreted Protein

Protein Pathways: MAPK signaling pathway, Neurotrophin signaling pathway
