GRO beta (CXCL2) (NM_002089) Human Recombinant Protein - TP720606L

Summary: This antimicrobial gene is part of a chemokine superfamily that encodes secreted proteins

involved in immunoregulatory and inflammatory processes. The superfamily is divided into four subfamilies based on the arrangement of the N-terminal cysteine residues of the mature

peptide. This chemokine, a member of the CXC subfamily, is expressed at sites of

inflammation and may suppress hematopoietic progenitor cell proliferation. [provided by
