## ICAM2 (NM\_000873) Human Recombinant Protein

#### **Product data:**

**Product Type:** Recombinant Proteins

**Description:** Purified recombinant protein of Human intercellular adhesion molecule 2 (ICAM2), transcript

variant 5

Species: Human Expression Host: HEK293

Expression cDNA Clone

or AA Sequence:

Lys25-Gln223

Tag: C-His

Predicted MW: 23.13 kDa

Concentration: lot specific

**Purity:** >95% as determined by SDS-PAGE and Coomassie blue staining

**Buffer:** Provided lyophilized from a 0.2 μm filtered solution of 20 mM Tris-HCl, 150 mM NaCl

Endotoxin: Endotoxin level is < 0.1 ng/μg of protein (< 1 EU/μg)

**Reconstitution Method:** Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the

lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

Storage: Store at -80°C.

**Stability:** Stable for at least 6 months from date of receipt under proper storage and handling

conditions.

**RefSeq:** <u>NP 000864</u>

Locus ID: 3384

UniProt ID: <u>P13598</u>, <u>Q6FHE2</u>

RefSeq Size: 1229

Cytogenetics: 17q23.3

RefSeq ORF: 825

Synonyms: CD102

## ICAM2 (NM\_000873) Human Recombinant Protein - TP720626XL

**Summary:** The protein encoded by this gene is a member of the intercellular adhesion molecule (ICAM)

family. All ICAM proteins are type I transmembrane glycoproteins, contain 2-9

immunoglobulin-like C2-type domains, and bind to the leukocyte adhesion LFA-1 protein. This

protein may play a role in lymphocyte recirculation by blocking LFA-1-dependent cell

adhesion. It mediates adhesive interactions important for antigen-specific immune response,

NK-cell mediated clearance, lymphocyte recirculation, and other cellular interactions

important for immune response and surveillance. Several transcript variants encoding the

same protein have been found for this gene. [provided by RefSeq, Jul 2008]

**Protein Families:** ES Cell Differentiation/IPS, Transmembrane

Protein Pathways: Cell adhesion molecules (CAMs), Natural killer cell mediated cytotoxicity
