

Product datasheet for TP720634M

CD46 (NM_153826) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins Description: Purified recombinant protein of Human CD46 molecule, complement regulatory protein (CD46), transcript variant d Species: Human **Expression Host: HEK293 Expression cDNA Clone** Cys35-Asp328 or AA Sequence: C-His Tag: Predicted MW: 33.83 kDa **Concentration:** lot specific **Purity:** >95% as determined by SDS-PAGE and Coomassie blue staining **Buffer:** Provided lyophilized from a 0.2 µm filtered solution of 20 mM Tris-HCl, 150 mM NaCl Endotoxin: Endotoxin level is $< 0.1 \text{ ng/}\mu\text{g}$ of protein ($< 1 \text{ EU/}\mu\text{g}$) **Reconstitution Method:** Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Storage: Store at -80°C. Stable for at least 6 months from date of receipt under proper storage and handling Stability: conditions. NP 722548 RefSeq: Locus ID: 4179 UniProt ID: P15529 3264 RefSeq Size: Cytogenetics: 1q32.2 **RefSeq ORF:** 1152 Synonyms: AHUS2; MCP; MIC10; TLX; TRA2.10

	CD46 (NM_153826) Human Recombinant Protein – TP720634M
Summary:	The protein encoded by this gene is a type I membrane protein and is a regulatory part of the complement system. The encoded protein has cofactor activity for inactivation of complement components C3b and C4b by serum factor I, which protects the host cell from damage by complement. In addition, the encoded protein can act as a receptor for the Edmonston strain of measles virus, human herpesvirus-6, and type IV pili of pathogenic Neisseria. Finally, the protein encoded by this gene may be involved in the fusion of the spermatozoa with the oocyte during fertilization. Mutations at this locus have been associated with susceptibility to hemolytic uremic syndrome. Alternatively spliced transcript variants encoding different isoforms have been described. [provided by RefSeq, Jun 2010]
Protein Familie	s: Druggable Genome, Transmembrane
Protein Pathwa	ys: Complement and coagulation cascades
