

# Product datasheet for TP720663XL

## CD16 (FCGR3A) (NM\_000569) Human Recombinant Protein

### **Product data:**

#### **Product Type: Recombinant Proteins Description:** Purified recombinant protein of Human Fc fragment of IgG, low affinity Illa, receptor (CD16a) (FCGR3A), transcript variant 1 Species: Human **Expression Host: HEK293 Expression cDNA Clone** Gly17-Gln208 or AA Sequence: C-His Tag: Predicted MW: 22.61 kDa **Concentration:** lot specific **Purity:** >95% as determined by SDS-PAGE and Coomassie blue staining **Buffer:** Lyophilized from a 0.2 um filtered solution of 20mM PB, 150mM NaCl, pH 7.4. Endotoxin: Endotoxin level is $< 0.1 \text{ ng/}\mu\text{g}$ of protein ( $< 1 \text{ EU/}\mu\text{g}$ ) Lyophilized protein should be stored at < -20°C, though stable at room temperature for 3 Storage: weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months. Stability: Stable for at least 6 months from date of receipt under proper storage and handling conditions. NP 000560 RefSeq: 2214 Locus ID: UniProt ID: P08637, M9MML0 **RefSeq Size:** 2406 Cytogenetics: 1q23.3 **RefSeq ORF:** 870 CD16; CD16A; FCG3; FCGR3; FCGRIII; FCR-10; FCRIII; FCRIIIA; IGFR3; IMD20 Synonyms:

	CD16 (FCGR3A) (NM_000569) Human Recombinant Protein – TP720663XL
Summary:	This gene encodes a receptor for the Fc portion of immunoglobulin G, and it is involved in the removal of antigen-antibody complexes from the circulation, as well as other responses, including antibody dependent cellular mediated cytotoxicity and antibody dependent enhancement of virus infections. This gene (FCGR3A) is highly similar to another nearby gene (FCGR3B) located on chromosome 1. The receptor encoded by this gene is expressed on natural killer (NK) cells as an integral membrane glycoprotein anchored through a transmembrane peptide, whereas FCGR3B is expressed on polymorphonuclear neutrophils (PMN) where the receptor is anchored through a phosphatidylinositol (PI) linkage. Mutations in this gene are associated with immunodeficiency 20, and have been linked to susceptibility to recurrent viral infections, susceptibility to systemic lupus erythematosus, and alloimmune neonatal neutropenia. Alternatively spliced transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Aug 2020]
Protein Families:	ES Cell Differentiation/IPS, Secreted Protein, Transmembrane
Protein Pathway	<b>s:</b> Fc gamma R-mediated phagocytosis, Natural killer cell mediated cytotoxicity, Systemic lupus erythematosus
