Product datasheet for TP720687XL

Activin Receptor Type IIA (ACVR2A) (NM_001616) Human Recombinant Protein

Product data:

| Product Type: | Recombinant Proteins |
|--|--|
| Description: | Purified recombinant protein of Human activin A receptor, type IIA (ACVR2A) |
| Species: | Human |
| Expression Host: | HEK293 |
| Expression cDNA Clone or AA Sequence: | Ala20-Pro134 |
| Tag: | C-His |
| Predicted MW: | 14.35 kDa |
| Concentration: | lot specific |
| Purity: | >95% as determined by SDS-PAGE and Coomassie blue staining |
| Buffer: | Provided lyophilized from a 0.2 μm filtered solution of 20 mM Tris-HCl, 150 mM NaCl |
| Endotoxin: | Endotoxin level is < 0.1 ng/μg of protein (< 1 EU/μg) |
| Reconstitution Method: | Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less |
| | than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. |
| Storage: | |
| Storage: Stability: | than 100 μg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. |
| • | than 100 μg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Store at -80°C. Stable for at least 6 months from date of receipt under proper storage and handling |
| Stability: | than 100 μg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.Store at -80°C.Stable for at least 6 months from date of receipt under proper storage and handling conditions. |
| Stability: RefSeq: | than 100 μg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Store at -80°C. Stable for at least 6 months from date of receipt under proper storage and handling conditions. <u>NP 001607</u> |
| Stability: RefSeq: Locus ID: | than 100 μg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Store at -80°C. Stable for at least 6 months from date of receipt under proper storage and handling conditions. <u>NP 001607</u> 92 |
| Stability: RefSeq: Locus ID: UniProt ID: | than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Store at -80°C. Stable for at least 6 months from date of receipt under proper storage and handling conditions. <u>NP 001607</u> 92 <u>P27037</u> |
| Stability: RefSeq: Locus ID: UniProt ID: RefSeq Size: | than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Store at -80°C. Stable for at least 6 months from date of receipt under proper storage and handling conditions. <u>NP 001607</u> 92 <u>P27037</u> 5244 |
| Stability: RefSeq: Locus ID: UniProt ID: RefSeq Size: Cytogenetics: | than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Store at -80°C. Stable for at least 6 months from date of receipt under proper storage and handling conditions. <u>NP 001607</u> 92 <u>P27037</u> 5244 2q22.3-q23.1 |

| | Activin Receptor Type IIA (ACVR2A) (NM_001616) Human Recombinant Protein – TP720687XL |
|-------------------------------------|---|
| Summary: | This gene encodes a receptor that mediates the functions of activins, which are members of the transforming growth factor-beta (TGF-beta) superfamily involved in diverse biological processes. The encoded protein is a transmembrane serine-threonine kinase receptor which mediates signaling by forming heterodimeric complexes with various combinations of type I and type II receptors and ligands in a cell-specific manner. The encoded type II receptor is primarily involved in ligand-binding and includes an extracellular ligand-binding domain, a transmembrane domain and a cytoplasmic serine-threonine kinase domain. This gene may be associated with susceptibility to preeclampsia, a pregnancy-related disease which can result in maternal and fetal morbidity and mortality. Alternative splicing results in multiple transcript variants of this gene. [provided by RefSeq, Jun 2013] |
