### CLIC1 (NM\_001288) Human Recombinant Protein

#### **Product data:**

**Product Type:** Recombinant Proteins

**Description:** Purified recombinant protein of Human chloride intracellular channel 1 (CLIC1)

Species: Human
Expression Host: E. coli

**Expression cDNA Clone** 

Met1-Lys241

or AA Sequence:

Tag: N-His

**Predicted MW:** 29 kDa

Concentration: lot specific

**Purity:** >95% as determined by SDS-PAGE and Coomassie blue staining

Buffer: Provided lyophilized from a 0.2 µm filtered solution of 20 mM Tris-HCl, 150 mM NaCl

Endotoxin: Endotoxin level is < 0.1 ng/μg of protein (< 1 EU/μg)

**Reconstitution Method:** Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the

lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100  $\mu$ g/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

Storage: Store at -80°C.

Stability: Stable for at least 6 months from date of receipt under proper storage and handling

conditions.

**RefSeq:** NP 001279

**Locus ID:** 1192

**UniProt ID:** <u>000299</u>, <u>Q5SRT3</u>

RefSeq Size: 1265

**Cytogenetics:** 6p21.33

RefSeq ORF: 723

Synonyms: CL1C1; CLCNL1; G6; NCC27

#### CLIC1 (NM\_001288) Human Recombinant Protein - TP720956L

**Summary:** Chloride channels are a diverse group of proteins that regulate fundamental cellular

processes including stabilization of cell membrane potential, transepithelial transport, maintenance of intracellular pH, and regulation of cell volume. Chloride intracellular channel 1 is a member of the p64 family; the protein localizes principally to the cell nucleus and exhibits both nuclear and plasma membrane chloride ion channel activity.
