

# Product datasheet for TP721029

## EIF5A2 (NM\_020390) Human Recombinant Protein

### **Product data:**

#### **Product Type: Recombinant Proteins Description:** Purified recombinant protein of Human eukaryotic translation initiation factor 5A2 (EIF5A2) Species: Human E. coli **Expression Host: Expression cDNA Clone** Met1-Lys153 or AA Sequence: N-His Tag: Predicted MW: 18.9 kDa **Concentration:** lot specific **Purity:** >95% as determined by SDS-PAGE and Coomassie blue staining **Buffer:** Provided lyophilized from a 0.2 µm filtered solution of 20 mM Tris-HCl, 150 mM NaCl Endotoxin: Endotoxin level is < 0.1 ng/ $\mu$ g of protein (< 1 EU/ $\mu$ g) **Reconstitution Method:** Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Store at -80°C. Storage: Stability: Stable for at least 6 months from date of receipt under proper storage and handling conditions. NP 065123 RefSeq: Locus ID: 56648 UniProt ID: Q9GZV4 **RefSeq Size:** 5537 Cytogenetics: 3q26.2 **RefSeq ORF:** 459 Synonyms: EIF-5A2; eIF5AII

	EIF5A2 (NM_020390) Human Recombinant Protein – TP721029
Summary:	mRNA-binding protein involved in translation elongation. Has an important function at the
	level of mRNA turnover, probably acting downstream of decapping. Involved in actin
	dynamics and cell cycle progression, mRNA decay and probably in a pathway involved in
	stress response and maintenance of cell wall integrity. Functions as a regulator of apoptosis.
	Mediates effects of polyamines on neuronal process extension and survival. May play an
	important role in brain development and function, and in skeletal muscle stem cell
	differentiation (By similarity).[UniProtKB/Swiss-Prot Function]
