## Product datasheet for TP721031M

## Activin Receptor Type IIB (ACVR2B) (NM\_001106) Human Recombinant Protein

## **Product data:**

| Product Type:  | Recombinant Proteins   |
|--|--|
| Description:   | Purified recombinant protein of Human activin A receptor, type IIB (ACVR2B)  |
| Species:   | Human  |
| Expression Host:   | HEK293   |
| Expression cDNA Clone<br>or AA Sequence:   | Ser19-Thr134   |
| Tag:   | C-His  |
| Predicted MW:  | 14.37 kDa  |
| Concentration:   | lot specific   |
| Purity:  | >95% as determined by SDS-PAGE and Coomassie blue staining   |
| Buffer:  | Provided lyophilized from a 0.2 $\mu$ m filtered solution of 20 mM Tris-HCl, 150 mM NaCl   |
| Endotoxin:   | Endotoxin level is < 0.1 ng/μg of protein (< 1 EU/μg)  |
| <b>Reconstitution Method:</b>  | Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the  |
|  | lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.   |
| Storage:   |  |
| Storage:<br>Stability:   | than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.  |
| -  | <ul><li>than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.</li><li>Store at -80°C.</li><li>Stable for at least 6 months from date of receipt under proper storage and handling</li></ul>  |
| Stability:   | <ul><li>than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.</li><li>Store at -80°C.</li><li>Stable for at least 6 months from date of receipt under proper storage and handling conditions.</li></ul>  |
| Stability:<br>RefSeq:  | <ul> <li>than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.</li> <li>Store at -80°C.</li> <li>Stable for at least 6 months from date of receipt under proper storage and handling conditions.</li> <li><u>NP 001097</u></li> </ul>  |
| Stability:<br>RefSeq:<br>Locus ID:   | <ul> <li>than 100 µg/ml. |                                   | Activin Receptor Type IIB (ACVR2B) (NM_001106) Human Recombinant Protein – TP721031M   |
|-----------------------------------|--|
| Summary:                          | Activins are dimeric growth and differentiation factors which belong to the transforming growth factor-beta (TGF-beta) superfamily of structurally related signaling proteins. Activins signal through a heteromeric complex of receptor serine kinases which include at least two type I (I and IB) and two type II (II and IIB) receptors. These receptors are all transmembrane proteins, composed of a ligand-binding extracellular domain with cysteine-rich region, a transmembrane domain, and a cytoplasmic domain with predicted serine/threonine specificity. Type I receptors are essential for signaling; and type II receptors form a stable complex after ligand binding, resulting in phosphorylation of type I receptors by type II receptors. Type II receptors are considered to be constitutively active kinases. This gene encodes activin A type IIB receptor, which displays a 3- to 4-fold higher affinity for the ligand than activin A type II receptor. [provided by RefSeq, Jul 2008] |
