

Product datasheet for TP721084M

IL21 (NM_021803) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins Description: Purified recombinant protein of Human interleukin 21 (IL21), transcript variant 1 Species: Human **HEK293 Expression Host:** Expression cDNA Clone Gln23-Ser155 or AA Sequence: Tag: Tag Free Predicted MW: 16.5 kDa **Concentration:** lot specific **Purity:** >95% as determined by SDS-PAGE and Coomassie blue staining **Buffer:** Provided lyophilized from a 0.2 µm filtered solution of 20 mM Tris-HCl, 150 mM NaCl Endotoxin: Endotoxin level is < 0.1 ng/ μ g of protein (< 1 EU/ μ g) **Reconstitution Method:** Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Store at -80°C. Storage: Stability: Stable for at least 6 months from date of receipt under proper storage and handling conditions. NP 068575 RefSeq: Locus ID: 59067 UniProt ID: Q9HBE4, A0A224B028 **RefSeq Size:** 642 Cytogenetics: 4q27 **RefSeq ORF:** 486 CVID11; IL-21; Za11 Synonyms:

IL21 (NM_021803) Human Recombinant Protein – TP721084M
This gene encodes a member of the common-gamma chain family of cytokines with immunoregulatory activity. The encoded protein plays a role in both the innate and adaptive immune responses by inducing the differentiation, proliferation and activity of multiple target cells including macrophages, natural killer cells, B cells and cytotoxic T cells. Dysregulation of this gene plays a role in multiple immune-mediated diseases including lupus, psoriasis and chronic inflammatory diseases. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. [provided by RefSeq, Dec 2011]
: Druggable Genome, Secreted Protein
ys: Cytokine-cytokine receptor interaction, Jak-STAT signaling pathway
