

# Product datasheet for TP721174M

## Neuritin (NRN1) (NM\_016588) Human Recombinant Protein

### **Product data:**

#### **Product Type: Recombinant Proteins Description:** Purified recombinant protein of Human neuritin 1 (NRN1) Species: Human E. coli **Expression Host: Expression cDNA Clone** Ala28-Gly116 or AA Sequence: N-His Tag: Predicted MW: 12.1 kDa **Concentration:** lot specific **Purity:** >95% as determined by SDS-PAGE and Coomassie blue staining **Buffer:** Lyophilized from a 0.2 um filtered solution of 20mM Tris-HCl, 150mM NaCl, pH 8.0. Endotoxin: Endotoxin level is < 0.1 ng/ $\mu$ g of protein (< 1 EU/ $\mu$ g) **Reconstitution Method:** Always centrifuge tubes before opening. Do not mix by vortex or pipetting. Dissolve the lyophilized protein in ddH2O. It is not recommended to reconstitute a concentration less than 100 µg/ml. Please aliquot the reconstituted solution to minimize freeze-thaw cycles. Lyophilized protein should be stored at $< -20^{\circ}$ C, though stable at room temperature for 3 Storage: weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months. Stability: Stable for at least 6 months from date of receipt under proper storage and handling conditions. **RefSeq:** NP 057672 Locus ID: 51299 UniProt ID: Q9NPD7 **RefSeq Size:** 2072 **Cytogenetics:** 6p25.1 **RefSeq ORF:** 426 Synonyms: dJ380B8.2; NRN

	Neuritin (NRN1) (NM_016588) Human Recombinant Protein – TP721174M
Summary:	This gene encodes a member of the neuritin family, and is expressed in postmitotic-
	differentiating neurons of the developmental nervous system and neuronal structures
	associated with plasticity in the adult. The expression of this gene can be induced by neural
	activity and neurotrophins. The encoded protein contains a consensus cleavage signal found
	in glycosylphoshatidylinositol (GPI)-anchored proteins. The encoded protein promotes neurite outgrowth and arborization, suggesting its role in promoting neuritogenesis. Overexpression
	of the encoded protein may be associated with astrocytoma progression. Alternative splicing
	results in multiple transcript variants. [provided by RefSeq, Jul 2013]
