PTPRN (NM 002846) Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Purified recombinant protein of Human protein tyrosine phosphatase, receptor type, N

(PTPRN), transcript variant 1

Species: Human
Expression Host: E. coli

Expression cDNA Clone

or AA Sequence:

Met687-Gln979

Tag: N-His

Predicted MW: 35.6 kDa

Purity: >95% as determined by SDS-PAGE and Coomassie blue staining

Buffer: Provided lyophilized from a 0.2 μm filtered solution of 20 mM Tris-HCl, 150 mM NaCl

Endotoxin: Endotoxin level is < 0.1 ng/μg of protein (< 1 EU/μg)

Storage: Store at -80°C.

Stability: Stable for at least 3 months from date of receipt under proper storage and handling

conditions.

RefSeq: NP 002837

Locus ID: 5798

UniProt ID: <u>Q16849</u>, <u>Q96IA0</u>

RefSeq Size: 3649 Cytogenetics: 2q35 RefSeq ORF: 2937

Synonyms: IA-2; IA-2/PTP; IA2; ICA512; R-PTP-N

PTPRN (NM_002846) Human Recombinant Protein - TP721209M

Summary: The protein encoded by this gene is a member of the protein tyrosine phosphatase (PTP)

family. PTPs are known to be signaling molecules that regulate a variety of cellular processes including cell growth, differentiation, mitotic cycle, and oncogenic transformation. This PTP possesses an extracellular region, a single transmembrane region, and a single catalytic domain, and thus represents a receptor-type PTP. This PTP was found to be an autoantigen that is reactive with insulin-dependent diabetes mellitus (IDDM) patient sera, and thus may be a potential target of autoimmunity in diabetes mellitus. Alternate splicing results in multiple

transcript variants.[provided by RefSeq, Dec 2010]

Protein Families: Druggable Genome, Transmembrane

Protein Pathways: Type I diabetes mellitus
