

Product datasheet for **TP721284**

TNFRSF17 Human Recombinant Protein

Product data:

Product Type:	Recombinant Proteins
Description:	Biotinylated Human BCMA Protein (C-Fc-Avi)
Species:	Human
Expression Host:	HEK293
Expression cDNA Clone or AA Sequence:	Met1-Ala54
Tag:	C-Fc-Avi
Predicted MW:	The protein has a predicted molecular weight of 34.3 kDa and migrates at approximately 35-45 kDa on SDS-PAGE with DTT-reduced conditions.
Concentration:	25µg size is bottled at 0.2mg/mL concentration. 100 µg size is bottled at lot specific concentration.
Purity:	>90%
Conjugation:	Biotin
Buffer:	1xPBS buffer, pH7.4
Bioactivity:	Positive

The definition of the active protein (purified and biotinylated) is defined as the protein that can bind to its biological receptor/ligand. For conjugated protein, it is defined with its function to bind to the ScFv of the active CAR-transfected cells in flow cytometry test.

Preparation:	Affinity Protein A
Applications:	ELISA
Storage:	An unopened vial can be stored at 4°C for 2 weeks or at -20°C and below for six months. This stock solution should be aliquoted and stored at ≤ -70°C to minimize the freeze/thaw cycles.
Stability:	6 Months
RefSeq:	NP_001183.2
Locus ID:	608
UniProt ID:	Q02223

Summary:

Human BCMA protein is also known as B cell maturation antigen (BCMA) or CD269 antigen. It is a member of the Tumor necrosis factor receptor superfamily, member 17 (TNFRSF17).

Product images:

Biotinylated Human BCMA Protein (C-Fc-Avi) on SDS-PAGE under reducing condition P(+) and non-reducing condition P(-). The purity of this protein appears to be greater than 95% based on Coomassie-blue staining.
