Human Recombinant Protein - TP721341

ELISA

Summary:Human TROP-2 protein is a type I cell surface glycoprotein highly expressed in a wide variety<br/>of human carcinomas. It is also referred to as tumor-associated calcium signal transducer 2<br/>(TACSTD2), gp50, GA733-1 or M1S1. TROP-2 transduces an intracellular calcium signal, which<br/>are consistent with the hypothesis that it acts as a cell surface receptor and support a search<br/>for a physiological ligand.
