

# Product datasheet for TP723234

# IL4 (NM\_000589) Human Recombinant Protein

## **Product data:**

#### **Product Type: Recombinant Proteins Description:** Purified recombinant protein of Human interleukin 4 (IL4), transcript variant 1. Species: Human E. coli **Expression Host:** MHKCDITLQE IIKTLNSLTE QKTLCTELTV TDIFAASKNT TEKETFCRAA TVLRQFYSHH EKDTRCLGAT **Expression cDNA Clone** or AA Sequence: AQQFHRHKQL IRFLKRLDRN LWGLAGLNSC PVKEANQSTL ENFLERLKTI MREKYSKCSS Tag: Tag Free Predicted MW: 15.1 kDa **Concentration:** lot specific **Purity:** >95% as determined by SDS-PAGE and Coomassie blue staining **Buffer:** Lyophilized from a 0.2 µM filtered solution of 20mM phosphate buffer,100mM NaCl, pH 7.2 ED50 as determined by the dose-dependent stimulation of human TF-1 cells is less than or **Bioactivity:** equal to 0.2 ng/ml, corresponding to a specific activity of $> 5 \times 10^{6}$ units/mg. Endotoxin: Endotoxin level is < 0.1 ng/ $\mu$ g of protein (< 1 EU/ $\mu$ g) Store at -80°C. Storage: Stable for at least 6 months from date of receipt under proper storage and handling Stability: conditions. RefSeq: NP 000580 Locus ID: 3565 **UniProt ID:** P05112 **RefSeq Size:** 921 Cytogenetics: 5q31.1 **RefSeq ORF:** 459 Synonyms: BCGF-1; BCGF1; BSF-1; BSF1; IL-4

#### **CRIGENE** IL4 (NM\_000589) Human Recombinant Protein – TP723234

The protein encoded by this gene is a pleiotropic cytokine produced by activated T cells. This Summary: cytokine is a ligand for interleukin 4 receptor. The interleukin 4 receptor also binds to IL13, which may contribute to many overlapping functions of this cytokine and IL13. STAT6, a signal transducer and activator of transcription, has been shown to play a central role in mediating the immune regulatory signal of this cytokine. This gene, IL3, IL5, IL13, and CSF2 form a cytokine gene cluster on chromosome 5q, with this gene particularly close to IL13. This gene, IL13 and IL5 are found to be regulated coordinately by several long-range regulatory elements in an over 120 kilobase range on the chromosome. IL4 is considered an important cytokine for tissue repair, counterbalancing the effects of proinflammatory type 1 cytokines, however, it also promotes allergic airway inflammation. Moreover, IL-4, a type 2 cytokine, mediates and regulates a variety of human host responses such as allergic, anti-parasitic, wound healing, and acute inflammation. This cytokine has been reported to promote resolution of neutrophil-mediated acute lung injury. In an allergic response, IL-4 has an essential role in the production of allergen-specific immunoglobin (lg) E. This proinflammatory cytokine has been observed to be increased in COVID-19 (Coronavirus disease 2019) patients, but is not necessarily associated with severe COVID-19 pathology. Two alternatively spliced transcript variants of this gene encoding distinct isoforms have been reported. [provided by RefSeq, Aug 2020]

#### Protein Families: Druggable Genome, Secreted Protein

Protein Pathways:Allograft rejection, Asthma, Autoimmune thyroid disease, Cytokine-cytokine receptor<br/>interaction, Fc epsilon RI signaling pathway, Hematopoietic cell lineage, Jak-STAT signaling<br/>pathway, T cell receptor signaling pathway
