## Product datasheet for TP723835

## Macrophage Inflammatory Protein 3 (CCL23) (NM\_145898) Human Recombinant Protein

## **Product data:**

| Product Type:                            | Recombinant Proteins   |
|--|--|
| Description:                             | Purified recombinant protein of Human chemokine (C-C motif) ligand 23 (CCL23 / MPIF-1),<br>transcript variant CKbeta8  |
| Species:                                 | Human  |
| Expression Host:                         | E. coli  |
| Expression cDNA Clone<br>or AA Sequence: | Human CCL23, the region of Arg22-Asn120, from gene Accession# P55773.3   |
| Tag:                                     | Tag Free   |
| Predicted MW:                            | 11.3 kDa   |
| Concentration:                           | lot specific   |
| Purity:                                  | >98%, as determined by Coomassie stained SDS-PAGE.   |
| Buffer:                                  | 1 x PBS  |
| Bioactivity:                             | Bioactivity was measured by its property to chemoattract THP-1 cells in a dose dependent manner.   |
| Endotoxin:                               | Less than 0.01 ng per $\mu g$ protein as determined by the LAL method  |
| Storage:                                 | Store at -80°C.  |
| Stability:                               | Unopened vial can be stored between 2°C and 8°C for up to 2 weeks, at -20°C for up to 6 months, or at -70°C or below until the expiration date. Aliquots can be stored between 2°C and 8°C for up to one week and stored at -20°C or colder for up to 3 months. Avoid repeated freeze/thaw cycles. |
| RefSeq:                                  | <u>NP 665905</u>   |
| Locus ID:                                | 6368   |
| UniProt ID:                              | <u>P55773</u>  |
| RefSeq Size:                             | 604  |
| Cytogenetics:                            | 17q12  |
| RefSeq ORF:                              | 360  |
| Synonyms:                                | CK-BETA-8; Ckb-8; Ckb-8-1; CKb8; hmrp-2a; MIP-3; MIP3; MPIF-1; SCYA23  |

|                 | Macrophage Inflammatory Protein 3 (CCL23) (NM_145898) Human Recombinant Protein –<br>TP723835   |
|-----------------|---|
| Summary:        | This gene is one of several chemokine genes clustered on the q-arm of chromosome 17.<br>Chemokines form a superfamily of secreted proteins involved in immunoregulatory and<br>inflammatory processes. The superfamily is divided into four subfamilies based on the<br>arrangement of the N-terminal cysteine residues of the mature peptide. This chemokine, a<br>member of the CC subfamily, displays chemotactic activity on resting T lymphocytes and<br>monocytes, lower activity on neutrophils and no activity on activated T lymphocytes. The<br>protein is also a strong suppressor of colony formation by a multipotential hematopoietic<br>progenitor cell line. In addition, the product of this gene is a potent agonist of the chemokine<br>(C-C motif) receptor 1. Alternative splicing results in multiple transcript variants that encode<br>different isoforms. [provided by RefSeq, Jul 2013] |
