Product datasheet for TP724108

Human IL18RA Protein, hFc Tag

Product data:

| Product Type: | Recombinant Proteins |
|------------------------|--|
| Description: | Human IL18RA Protein, hFc Tag |
| Expression Host: | HEK293 |
| Tag: | C-Human Fc |
| Predicted MW: | The protein has a predicted molecular mass of 61.9 kDa after removal of the signal peptide.The apparent molecular mass of IL18RA-hFc is approximately 55-70 kDa due to glycosylation. |
| Purity: | The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining. |
| Reconstitution Method: | Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. |
| Storage: | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature. |
| Stability: | 12 months from date of despatch |
| Synonyms: | CD218a, CDw218a, IL-1Rrp, IL-18R-alpha, IL-18Ralpha, IL1RRP, IL18RA, IL18Ralpha2 |
| Summary: | The protein encoded by this gene is a cytokine receptor that belongs to the interleukin 1 receptor family. This receptor specifically binds interleukin 18 (IL18), and is essential for IL18 mediated signal transduction. IFN-alpha and IL12 are reported to induce the expression of this receptor in NK and T cells. This gene along with four other members of the interleukin 1 receptor family, including IL1R2, IL1R1, ILRL2 (IL-1Rrp2), and IL1RL1 (T1/ST2), form a gene cluster on chromosome 2q. Alternatively spliced transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Sep 2013] |
