Human GUCY2C Protein, His Tag

Product data:

Product Type: Recombinant Proteins

Description: Human GUCY2C Protein, His Tag

Expression Host: HEK293
Tag: C-6×His

Predicted MW: The protein has a predicted molecular mass of 46.8 kDa after removal of the signal peptide.

The apparent molecular mass of GUCY2C-His is approximately 55-130 kDa due to

glycosylation.

Purity: The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie

blue staining.

Reconstitution Method: Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants

before lyophilization.

Storage: Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended

for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient temperature.

Stability: 12 months from date of despatch

Summary: This gene encodes a transmembrane protein that functions as a receptor for endogenous

peptides guanylin and uroguanylin, and the heat-stable E. coli enterotoxin. The encoded protein activates the cystic fibrosis transmembrane conductance regulator. Mutations in this

gene are associated with familial diarrhea (autosomal dominant) and meconium ileus

(autosomal recessive). [provided by RefSeq, Nov 2016]
