Human CD94 Protein, hFc Tag

Product data:

Product Type: Recombinant Proteins

Description: Human CD94 Protein, hFc Tag

Expression Host: HFK293

Tag: N-Human Fc

Predicted MW: The protein has a predicted molecular mass of 43.3 kDa after removal of the signal

peptide. The apparent molecular mass of hFc-CD94 is approximately 55-70 kDa due to

glycosylation.

Purity: The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie

blue staining.

Reconstitution Method: Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants

before lyophilization.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended Storage:

for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient temperature.

12 months from date of despatch Stability:

KP43; KLRD1 Synonyms:

Summary: Natural killer (NK) cells are a distinct lineage of lymphocytes that mediate cytotoxic activity

and secrete cytokines upon immune stimulation. Several genes of the C-type lectin

superfamily, including members of the NKG2 family, are expressed by NK cells and may be involved in the regulation of NK cell function. KLRD1 (CD94) is an antigen preferentially expressed on NK cells and is classified as a type II membrane protein because it has an external C terminus. Several transcript variants encoding different isoforms have been found

for this gene. [provided by RefSeq, May 2017]
