

Product datasheet for **TP724632**

IL2 Human Recombinant Protein

Product data:

Product Type:	Recombinant Proteins
Description:	Recombinant Human Interleukin-2/IL2 (C-His)
Species:	Human
Expression cDNA Clone or AA Sequence:	A21-T153
Tag:	C-6His
Buffer:	Lyophilized from a 0.2 um filtered solution of PBS, pH 7.4
Note:	Recombinant Human Interleukin-2 is produced by Human 293 Cells. The target gene encoding A21-T153 is expressed with a 6His tag at the C terminus.
Stability:	12 months from date of despatch
Locus ID:	3558
UniProt ID:	P60568
Summary:	Interleukin-2 (IL-2) is an interleukin, a type of cytokine signaling molecule in the immune system, and belongs to the IL-2 family. It is a leukocytotrophic hormone that is instrumental in the body's natural response to microbial infection and in discriminating between foreign (non-self) and self. IL-2 is also a powerful immunoregulatory lymphokine produced by T-cells in response to antigenic or mitogenic stimulation. IL-2/IL-2R signaling is required for T-cell proliferation and other fundamental functions that are essential for the immune response. IL-2 stimulates growth and differentiation of B-cells, NK cells, lymphokine-activated killer cells, monocytes, macrophages and oligodendrocytes.
