

Product datasheet for **TP726660**

CD79B Rhesus Recombinant Protein

Product data:

Product Type:	Recombinant Proteins
Description:	Recombinant Rhesus Macaque CD79B (C-6His)
Species:	Rhesus
Expression cDNA Clone or AA Sequence:	Ala30-Asp161
Tag:	C-6His
Buffer:	Lyophilized from a 0.2 um filtered solution of PBS, pH7.4.
Note:	Recombinant Rhesus macaque CD79B is produced by our Mammalian expression system and the target gene encoding Ala30-Asp161 is expressed with a 6His tag at the C-terminus.
Stability:	12 months from date of despatch
Locus ID:	718218
Summary:	CD79B is a single-pass type I membrane protein. CD79B contains one Ig-like V-type domain and one ITAM domain. CD79B is required in cooperation with CD79A for initiation of the signal transduction cascade activated by the B-cell antigen receptor complex (BCR), which leads to internalization of the complex, trafficking to late endosomes and antigen presentation. CD79B enhances phosphorylation of CD79A, possibly by recruiting kinases that phosphorylate CD79A or by recruiting proteins that bind to CD79A and protect it from dephosphorylation.
