

Product datasheet for **TP726699**

TACI (TNFRSF13B) Human Recombinant Protein

Product data:

Product Type:	Recombinant Proteins
Description:	Recombinant Human TACI (C-Fc)
Species:	Human
Expression cDNA Clone or AA Sequence:	Ser2 [→] Thr166
Tag:	C-Fc
Buffer:	Lyophilized from a 0.2 um filtered solution of PBS, pH7.4.
Note:	Recombinant Human Transmembrane Activator and CAML Interactor is produced by our Mammalian expression system and the target gene encoding Ser2 [→] Thr166 is expressed with a Fc tag at the C-terminus.
Storage:	Lyophilized protein should be stored at < -20°C, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
Stability:	12 months from date of despatch
Locus ID:	23495
UniProt ID:	O14836
Synonyms:	Tumor necrosis factor receptor superfamily member 13B;Transmembrane activator and CAML interactor;CD267; Tnfrsf13b
Summary:	Tumor necrosis factor receptor superfamily member 13B, also known as TNFRSF13B or more commonly as TACI (transmembrane activator and CAML interactor), is a transmembrane receptor protein found predominantly on the surface of B cells, which are an important part of the immune system.
Protein Families:	Druggable Genome, Transmembrane
Protein Pathways:	Cytokine-cytokine receptor interaction, Primary immunodeficiency
