

## Product datasheet for **TP726885**

### IL17 (IL17A) Human Recombinant Protein

#### Product data:

Product Type:	Recombinant Proteins
Description:	Recombinant Human Interleukin-17A/IL-17A (C-6His)
Species:	Human
Expression cDNA Clone or AA Sequence:	Gly24-Ala155
Tag:	C-His
Buffer:	Lyophilized from a 0.2 um filtered solution of PBS, pH 7.4.
Note:	Recombinant Human Interleukin-17A is produced by our Mammalian expression system and the target gene encoding Gly24-Ala155 is expressed with a 6His tag at the C-terminus.
Stability:	12 months from date of despatch
Locus ID:	3605
UniProt ID:	<a href="#">Q16552</a>
Summary:	Interleukin-17 is a potent pro-inflammatory cytokine produced by activated memory T cells. There are at least six members of the IL-17 family in humans and in mice. As IL-17 shares properties with IL-1 and TNF-alpha, it may induce joint inflammation and bone and cartilage destruction. This cytokine is found in synovial fluids of patients with rheumatoid arthritis, and produced by rheumatoid arthritis synovium. It increases IL-6 production, induces collagen degradation and decreases collagen synthesis by synovium and cartilage and proteoglycan synthesis in cartilage. IL-17 is also able to increase bone destruction and reduce its formation. Blocking of interleukin-17 with specific inhibitors provides a protective inhibition of cartilage and bone degradation.
