Product Type:	Recombinant Proteins
Description:	Recombinant Human AMIGO2 (C-Fc)
Species:	Human
Expression cDNA Clone or AA Sequence:	Gly39-His393
Tag:	C-Fc
Buffer:	Lyophilized from a 0.2 um filtered solution of PBS, pH 7.4.
Note:	Recombinant Human Amphoterin-induced Gene and ORF 2 is produced by our Mammalian expression system and the target gene encoding Gly39-His393 is expressed with a Fc tag at the C-terminus.
Stability:	12 months from date of despatch
Locus ID:	347902
UniProt ID:	<u>Q865J2</u>
Summary:	Amphoterin-Induced Protein 2 (AMIGO2) is a single-pass type I membrane protein which belongs to the AMIGO family of immunoglobulin superfamily. Mature AMIGO2 contains an Ig- like C2-type (immunoglobulin-like) domain, 6 LRR (leucine-rich) repeats, a LRRCT domain, as well as a LRRNT domain. AMIGO2 is mainly expressed in in breast, ovary, cervix, and uterus, although lower in lung, colon, and rectum. AMIGO2 required for depolarization-dependent survival of cultured cerebellar granule neurons. AMIGO2 may mediate homophilic as well as heterophilic cell-cell interaction with AMIGO1 or AMIGO3. AMIGO2 may contribute to signal transduction through its intracellular domain, and may be required for tumorigenesis of a subset of gastric adenocarcinomas.
