

Product datasheet for **TP727125**

LC3B (MAP1LC3B) Human Recombinant Protein

Product data:

Product Type:	Recombinant Proteins
Description:	Recombinant Human Microtubule-associated Proteins 1A/1B Light Chain 3B/MAP1LC3B
Species:	Human
Expression cDNA Clone or AA Sequence:	Met1-Val125
Buffer:	Lyophilized from a 0.2 um filtered solution of 20mM Tris, 150mM NaCl, 2mM DTT, pH 8.0 .
Note:	Recombinant Human Microtubule-associated Proteins 1A/1B Light Chain 3B is produced by our E.coli expression system and the target gene encoding Met1-Val125 is expressed.
Stability:	12 months from date of despatch
Locus ID:	81631
UniProt ID:	Q9GZQ8
Summary:	Microtubule-associated proteins 1A/1B light chain 3B (MAP1LC3B) is a member of the highly conserved ATG8 protein family. ATG8 proteins are present in all known eukaryotic organisms. MAP1LC3B is one of the four genes in the MAP1LC3 subfamily (others include MAP1LC3A, MAP1LC3C, and MAP1LC3B2). It is most abundantly expressed in heart, brain, skeletal muscle and testis. LMAP1LC3B is a subunit of neuronal microtubule and functions in formation of autophagosomal vacuoles (autophagosomes). It associated MAP1A and MAP1B proteins, which are involved in microtubule assembly and important for neurogenesis. MAP1LC3B also plays a role in autophagy, a process that involves the bulk degradation of cytoplasmic component.
