

Product datasheet for TP727500

Pdgfra Mouse Recombinant Protein

Product data:

Product Type:	Recombinant Proteins
Description:	Recombinant Mouse PDGFR $\hat{\pm}$ /PDGFRA/CD140a (C-6His)
Species:	Mouse
Expression cDNA Clone or AA Sequence:	Leu25-Glu524
Tag:	C-His
Buffer:	Lyophilized from a 0.2 um filtered solution of PBS, pH 7.4.
Note:	Recombinant Mouse Platelet-derived growth factor receptor alpha is produced by our Mammalian expression system and the target gene encoding Leu25-Glu524 is expressed with a 6His tag at the C-terminus.
Storage:	Lyophilized protein should be stored at < -20°C, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
Stability:	12 months from date of despatch
Locus ID:	18595
UniProt ID:	P26618
Synonyms:	Platelet-derived growth factor receptor alpha; PDGF-R-alpha; Alpha platelet-derived growth factor receptor; Alpha-type platelet-derived growth factor receptor; CD140a; Pdgfra
Summary:	Platelet-derived growth factor receptors (PDGFR) are cell surface tyrosine kinase receptors for members of the platelet-derived growth factor (PDGF) family. The PDGF family consists of PDGF-A, -B, -C and -D, which form either homo- or heterodimers (PDGF-AA, -AB, -BB, -CC, -DD). The four PDGFs are inactive in their monomeric forms. PDGFs bind to the protein tyrosine kinase receptors PDGF receptor- $\hat{\pm}$ and - $\hat{2}$. These two receptor isoforms dimerize upon binding the PDGF dimer, leading to three possible receptor combinations, namely - $\hat{\pm}\hat{\pm}$, - $\hat{2}\hat{2}$ and - $\hat{\pm}\hat{2}$. PDGFR $\hat{\pm}$ and PDGFR $\hat{2}$ are members of the class III RTK family. Inappropriate PDGFR $\hat{\pm}$ and PDGFR $\hat{2}$ signaling has been linked to a number of proliferative disorders.
