

Product datasheet for **TP727576**

Cstb Mouse Recombinant Protein

Product data:

Product Type:	Recombinant Proteins
Description:	Recombinant Mouse Cystatin 8/CST8 (N-6His)
Species:	Mouse
Expression cDNA Clone or AA Sequence:	Met1-Phe98
Tag:	N-His
Buffer:	Lyophilized from a 0.2 um filtered solution of 20mM Tris-HCl, 150mM NaCl, pH 8.0.
Note:	Recombinant Mouse Cystatin-B is produced by our E.coli expression system and the target gene encoding Met1-Phe98 is expressed with a 6His tag at the N-terminus.
Stability:	12 months from date of despatch
Locus ID:	13014
UniProt ID:	Q62426
Summary:	Cystatin B, also called stefin B or liver thiol proteinase inhibitor, is a member of family 1 of the cystatin superfamily. Like Cystatin A, it is an intracellular inhibitor regulating the activities of cysteine proteases of the papain family such as cathepsins B, H and L. Defects in Cystatin-B / CSTB are the cause of progressive myoclonic epilepsy type 1 (EPM1) which is an autosomal recessive disorder characterized by severe, stimulus-sensitive myoclonus and tonic-clonic seizures.
