

Product datasheet for **TP727584**

Ccl3 Mouse Recombinant Protein

Product data:

Product Type:	Recombinant Proteins
Description:	Recombinant Mouse C-C Motif Chemokine 3/CCL3/MIP-1a(N-6His)
Species:	Mouse
Expression cDNA Clone or AA Sequence:	Ala24-Ala92
Tag:	N-His
Buffer:	Lyophilized from a 0.2 um filtered solution of 20mM Tris-HCl, 150mM NaCl, 5%Trehalose, 1mM EDTA, pH 8.0.
Note:	Recombinant Mouse C-C Motif Chemokine 3 is produced by our E.coli expression system and the target gene encoding Ala24-Ala92 is expressed with a 6His tag at the N-terminus.
Stability:	12 months from date of despatch
Locus ID:	20302
UniProt ID:	P10855
Summary:	C-C Motif Chemokine 3 (MIP-1 alpha,CCL3) is a member of the beta or CC subfamily of chemokines and is closely related to CCL4/MIP-1 beta. CCL3 expression can be induced in a variety of hematopoietic cells, fibroblasts, smooth muscle cells, and epithelial cells. Mature mouse CCL3 shares 73%, 91%, and 82% amino acid sequence identity with human, rat, and cotton rat CCL3, respectively. CCL3 exerts its biological functions through interactions with CCR1, CCR3, and CCR5. It is cleared from the extracellular space by internalization via the decoy chemokine receptor D6. CCL3 promotes the chemoattraction, adhesion to activated vascular endothelium, and cellular activation of many hematopoietic cell types including activated T cells, NK cells, neutrophils, monocytes, immature dendritic cells, and eosinophils. CCL3 is also known as stem cell inhibitor (SCI) and can inhibit the proliferation of hematopoietic progenitor cells. CCL3 bioactivity contributes to tumor metastasis and the inflammatory components of viral infection, rheumatoid arthritis, and hepatitis, although it also can suppress the replication of HIV.
