

Product datasheet for TP727624

IL36RN Human Recombinant Protein

Product data:

Product Type: Recombinant Proteins

Description: Recombinant Human IL-36RA

Species: Human

Expression cDNA Clone

or AA Sequence:

Val2-Asp155

Buffer: Lyophilized from a 0.2 um filtered solution of PBS, pH7.4.

Recombinant Human Interleukin-36 Receptor Antagonist Protein is produced by our E.coli Note:

expression system and the target gene encoding Val2-Asp155 is expressed.

Lyophilized protein should be stored at < -20°C, though stable at room temperature for 3 Storage:

weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of

reconstituted samples are stable at < -20°C for 3 months.

Stability: 12 months from date of despatch

Locus ID: 26525 **UniProt ID:** Q9UBH0

Summary: Human Interleukin-36 Receptor Antagonist (IL-36RN) is a secreted protein which belongs to

the Interleukin 1 cytokine family (IL-1 family). IL-36RN is predominantly expressed in

keratinocytes but not in fibroblasts, endothelial cells or melanocytes. IL-36RN is also detected in the spleen, brain leukocyte and macrophage cell types. Increased in lesional psoriasis skin. IL-36RN is a highly and a specific antagonist of the IL-1 receptor-related protein 2-mediated response to Interleukin 1 family member 9 (IL1F9). Dysregulated expression of novel agonistic and antagonistic IL-1 family member ligands can promote cutaneous inflammation, revealing potential novel targets for the treatment of inflammatory skin disorders. Human and mouse

IL-36RN share 90% sequence identity.
