

Product datasheet for **TP727626**

Cynomolgus Recombinant Protein

Product data:

Product Type:	Recombinant Proteins
Description:	Recombinant Cynomolgus TSLP (C-6His)
Species:	Cynomolgus
Expression cDNA Clone or AA Sequence:	Tyr29-Gln159(Gln37Glu)
Tag:	C-6His
Buffer:	Lyophilized from a 0.2 um filtered solution of 20mM PB , 500mM NaCl, pH 7.4.
Note:	Recombinant Cynomolgus Thymic Stromal Lymphopoietin is produced by our E.coli expression system and the target gene encoding Tyr29-Gln159(Glu37Gln) is expressed with a 6His tag at the C-terminus.
Stability:	12 months from date of despatch
Summary:	Thymic stromal lymphopoietin (TSLP) is a protein belonging to the cytokine family, contains 140 amino acids. It is known to play an important role in the maturation of T cell populations through activation of antigen presenting cells. TSLP induces the release of T-cell-attracting chemokines from monocytes and, in particular, enhances the maturation of CD11c+ dendritic cells. It can induce allergic inflammation by directly activating mast cells. TSLP is produced mainly by non-hematopoietic cells such as fibroblasts, epithelial cells and different types of stromal or stromal-like cells. These cells are located in regions where TSLP activity is required.
