## **CD226 Human Recombinant Protein**

**Product data:** 

**Product Type:** Recombinant Proteins

**Description:** Recombinant Human CD226 Antigen/DNAM-1/CD226 (C-Fc)

Species: Human

**Expression cDNA Clone** 

or AA Sequence:

Glu19-Asn247

Tag: C-Fc

**Buffer:** Lyophilized from a 0.2 um filtered solution of PBS, pH 7.4.

**Note:** Recombinant Human CD226 Antigen is produced by our Mammalian expression system and

the target gene encoding Glu19-Asn247 is expressed with a Fc tag at the C-terminus.

**Stability:** 12 months from date of despatch

**Locus ID:** 10666 **UniProt ID:** Q15762

Summary: Human DNAX accessory molecule 1 (DNAM-1/CD226) is a 65 kDa type I transmembrane

glycoprotein in the immunoglobulin superfamily. Mature human DNAM-1 contains an extracellular domain (ECD) with two Ig-like C2-set domains and a cytoplasmic region that contains motifs for binding PDZ domains and band 4.1 family proteins. DNAM-1 is expressed on multiple lymphoid and myeloid cells and interacts with CD155 and CD112. Ligation of DNAM-1 promotes the activation of NK cells, CD8+ T cells, and mast cells, dendritic cell maturation, megakaryocyte and activated platelet adhesion to vascular endothelial cells, and monocyte extravasation; it inhibits the forrmation of osteoclasts. Plateletendothelium,

interactions mediated by DNAM-1, enable the metastasis of tumor cells to the lung.
