

Product datasheet for **TP727878**

Angiopoietin like 4 (ANGPTL4) Human Recombinant Protein

Product data:

Product Type:	Recombinant Proteins
Description:	Recombinant Human ANGPTL4 (N-6His)
Species:	Human
Expression cDNA Clone or AA Sequence:	Pro166-Ser406
Tag:	N-6His
Buffer:	Lyophilized from a 0.2 um filtered solution of PBS,pH7.4.
Note:	Recombinant Human Angiopoietin Like protein 4 is produced by our Mammalian expression system and the target gene encoding Pro166-Ser406 is expressed with a 6His tag at the N-terminus.
Storage:	Lyophilized protein should be stored at < -20°C, though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at 4-7°C for 2-7 days. Aliquots of reconstituted samples are stable at < -20°C for 3 months.
Stability:	12 months from date of despatch
Locus ID:	51129
UniProt ID:	Q9BY76
Synonyms:	Angiopoietin-related protein 4;425O18-1;Angiopoietin-like protein 4;Fasting-induced adipose factor;Hepatic fibrinogen/angiopoietin-related protein;HFARP;Secreted protein Bk89;Angptl4;Farp; Fiaf; Ng27
Summary:	Angiopoietin-related protein 4 (ANGPTL4) is a secreted protein and contains 1 fibrinogen C-terminal domain. The protein may act as a regulator of angiogenesis and modulate tumorigenesis. It inhibits proliferation, migration, and tubule formation of endothelial cells and reduces vascular leakage. ANGPTL4 may exert a protective function on endothelial cells through an endocrine action. It is directly involved in regulating glucose homeostasis, lipid metabolism, and insulin sensitivity (By similarity). In response to hypoxia, the unprocessed form of the protein accumulates in the subendothelial extracellular matrix (ECM). The matrix-associated and immobilized unprocessed form limits the formation of actin stress fibers and focal contacts in the adhering endothelial cells and inhibits their adhesion. It also decreases motility of endothelial cells and inhibits the sprouting and tube formation.
