## **PVRL4 (NECTIN4) Human Recombinant Protein**

**Product data:** 

**Product Type:** Recombinant Proteins

**Description:** Recombinant Human Nectin-4 (C-Fc)

Species: Human

**Expression cDNA Clone** 

or AA Sequence:

Gly31-Val351

Tag: C-Fc

Buffer: Lyophilized from a 0.2 um filtered solution of 20mM PB, 150mM NaCl, pH 7.4.

**Note:** Recombinant Human Poliovirus Receptor-Related Protein 4 is produced by our Mammalian

expression system and the target gene encoding Gly32-Val351 is expressed with a Fc tag at

the C-terminus.

**Stability:** 12 months from date of despatch

 Locus ID:
 81607

 UniProt ID:
 Q96NY8

Summary: Nectin-4 (PVRL4) is a type I transmembrane glycoprotein which belongs to the nectin family

of Ig superfamily proteins. It contains two Ig-like C2-type domains and one Ig-like V-type domain. PVRL4 seems to be involved in cell adhesion through trans-homophilic and -

heterophilic interactions, the latter including specifically interactions with nectin-1. It does not

act as receptor for alpha-herpesvirus entry into cells. It is predominantly expressed in placenta, the embryo and breast carcinoma. But it is not detected in normal breast epithelium. The soluble form is produced by proteolytic cleavage at the cell surface (shedding), probably by ADAM17. Mutations in this gene are the cause of ectodermal

dysplasia-syndactyly syndrome type 1, an autosomal recessive disorder.
