

## Product datasheet for **TP727970**

### IL13 Mouse Recombinant Protein

#### Product data:

Product Type:	Recombinant Proteins
Description:	Recombinant Mouse Interleukin-13/IL-13 (Ser26-Phe131,C-6His)
Species:	Mouse
Expression cDNA Clone or AA Sequence:	Ser26-Phe131
Tag:	C-His
Buffer:	Lyophilized from a 0.2 um filtered solution of PBS, pH 7.4.
Note:	Recombinant Mouse Interleukin-13 is produced by our Mammalian expression system and the target gene encoding Ser26-Phe131 is expressed with a 6His tag at the C-terminus.
Stability:	12 months from date of despatch
Locus ID:	16163
UniProt ID:	<a href="#">P20109</a>
Summary:	Mouse interleukin 13 (mIL-13) is a pleiotropic cytokine produced by activated Th2 cells. IL-13 induces B cell proliferation and immunoglobulin production. It contains a four helical bundle with two internal disulfide bonds. Mouse IL13 shares 58% sequence identity with human protein and exhibits cross-species activity. IL13 signals via receptor IL13R (type2, IL4R) and activates STAT-6. IL13 initially binds IL-13R $\alpha$ 1 with low affinity and triggers association of IL4R $\alpha$ , generating a high affinity heterodimeric receptor IL13R and eliciting downstream signals. IL13 also binds IL-13R $\alpha$ 2 with high affinity, which plays a role in a negative feedback system of IL13 signaling. IL13 is an important mediator of allergic inflammation and disease.
