| Product Type:                            | Recombinant Proteins  |
|--|---|
| Description:                             | Recombinant Activin B, Human  |
| Species:                                 | Human   |
| Expression Host:                         | E. coli   |
| Expression cDNA Clone<br>or AA Sequence: | MGLECDGRTNLCCRQQFFIDFRLIGWNDWIIAPTGYYGNYCEGSCPAYLAGVPGSASSFHTAVVNQYRMR<br>GLNPGTVNSCCIPTKLSTMSMLYFDDEYNIVKRDVPNMIVEECGCA with polyhistidine tag at the C-<br>terminus.  |
| Tag:                                     | His Tag (C-term)  |
| Predicted MW:                            | The protein has a calculated MW of 13.75 kDa. The protein migrates as 17 kDa under reducing condition (SDS-PAGE analysis).  |
| Purity:                                  | >98% as determined by SDS-PAGE.   |
| Buffer:                                  | The protein was lyophilized from a 0.2 $\mu m$ filtered solution containing 1X PBS, pH 8.0.   |
| Bioactivity:                             | Measure by its ability to induce hemoglobin expression in K562 cells. The ED₅₀ for this effect is <0.7 ng/mL. The specific activity of recombinant human Activin B is > 1.5 x 10 <sup>6</sup> IU/mg.  |
| Endotoxin:                               | <0.1 EU per 1 $\mu$ g of the protein by the LAL method.   |
| Reconstitution Method:                   | Centrifuge at 3000 rpm for 5 mins before opening. It is recommended to reconstitute the lyophilized protein in sterile $H_2O$ to a concentration not less than 100 µg/mL and incubate the stock solution at room temperature for at least 20 mins to ensure sufficient re-dissolved. Do Not Vortex! Vigorous shaking may impair the biological activity of the protein. |
| Applications:                            | Cell culture  |
| Storage:                                 | Lyophilized protein should be stored at -20°C for 1 year. Upon reconstitution, store at 2°C to<br>8°C for up to 1 week. Further dilute in a buffer containing a carrier protein or stabilizer (e.g.<br>0.1% BSA, 10%FBS, 5%HSA or 5% trehalose solution), protein aliquots should be stored at -<br>20°C or -80°C for 3-6 months. Avoid repeated freeze/thaw cycles.    |
| UniProt ID:                              | <u>P09529</u>   |
| Synonyms:                                | Activin Beta B, INHBB; inhibin beta B chain   |

#### **PORIGENE** Recombinant Activin B, Human – TP728144L

Summary: Activin B is the cytokine of the TGF-beta family, which is a 13 kDa protein containing 115 amino acid residues. Activin B has the wide variety of biological function including stem cell differentiation, inflammation, bone remodeling and neural development. They also have a role in regulation of FSH secretion. Activin B induces the phosphorylation of Smad which binds the smad binding element.
