

Product datasheet for **TP728160**

Recombinant BMP-6 (Bone morphogenetic protein-6) □ Human

Product data:

Product Type:	Recombinant Proteins
Description:	Recombinant BMP-6 (Bone morphogenetic protein-6) □ Human
Species:	Human
Expression Host:	E. coli
Expression cDNA Clone or AA Sequence:	MVSSASDYNSSELKTACRKHELYVSFQDLGWQDWIIAPKGYAANYCDGECFPLNAHMNATNHAIQVTLVHLMNPEYVPKPCCAPTKLNAISVLYFDDNSNVILKKYRNMVVRACGCH with polyhistidine tag at the C-terminus.
Tag:	His Tag (C-term)
Predicted MW:	The protein has a calculated MW of 14.07 kDa. The protein migrates as 13 kDa under reducing condition (SDS-PAGE analysis).
Purity:	>98% as determined by SDS-PAGE.
Buffer:	The protein was lyophilized from a 0.2 μ m filtered solution containing 1 \times PBS, pH 8.0.
Bioactivity:	Measure by its ability to induce alkaline phosphatase production by ATDC5 cells. The ED ₅₀ for this effect is <87 ng/mL.
Endotoxin:	<0.1 EU per 1 μ g of the protein by the LAL method.
Reconstitution Method:	Centrifuge at 3000 rpm for 5 mins before opening. It is recommended to reconstitute the lyophilized protein in sterile H ₂ O to a concentration not less than 100 μ g/mL and incubate the stock solution at room temperature for at least 20 mins to ensure sufficient re-dissolved. Do Not Vortex! Vigorous shaking may impair the biological activity of the protein.
Applications:	Cell culture
Storage:	Lyophilized protein should be stored at -20°C for 1 year. Upon reconstitution, store at 2°C to 8°C for up to 1 week. Further dilute in a buffer containing a carrier protein or stabilizer (e.g. 0.1% BSA, 10%FBS, 5%HSA or 5% trehalose solution), protein aliquots should be stored at -20°C or -80°C for 3-6 months. Avoid repeated freeze/thaw cycles.
UniProt ID:	P22004
Synonyms:	VGR, VG-1-related protein

Summary:

Bone Morphogenetic Protein-6 (BMP-6) is an extracellular multifunctional cytokine that is also a member of the TGF- β family. BMP-6 can bind with the TGF- β receptor and triggers SMAD protein signal transduction. It can keep joint integrity and stability in adults and plays a vital role in regulating hepcidin to maintain iron ions in the body.
